Subject: Change in the Network Statement

Dear Partner,

We would like to inform you that on 13.12.2023 the VPE Vasúti Pályakapacitás-elosztó Nonprofit Kft (Rail Capacity Allocation Office) published the Amendment No. 16A to the Network Statement of MÁV Zrt. and GYSEV Zrt. on the conditions of use of the open access railway network of MÁV Zrt. and GYSEV Zrt. for the 2023/2024 timetable period, which includes, inter alia the regulation on overloaded tracks and the new rule on loading in public loading areas. The latter is highlighted in our current letter as it will result in significant changes in respect of loading by machine in public loading areas.

"Environmental rules for loading activities

*In order to carry out loading and unloading activities in public loading areas using loading machines and/or mobile unloading and reloading equipment, an application has to be submitted to the competent Regional Directorate of Railway Infrastructure Manager. **The application must be accompanied by any permits required by environmental or other legislation, where it is justified by the nature of the loading activity. In accordance with Government Decree 306/2010 (XII. 23.) on air protection, loading (as an activity) by loading machines is considered a diffuse source, and therefore the operator must have an air pollution control permit issued by the Environmental Protection Authority for the site in question valid at the time of loading.***

The official information of VPE Ltd, which will provide you with more details on the changes, is attached to this letter.

The Network Statement for 2023/2024 is valid and in force from 14 December 2023. The full document is available at the following link: [- VPE - Vasúti Pályakapacitás-elosztó Kft.halozati-uzletszabalyzat-husz/husz-2023-2024 .](#)

Please take into account the provisions of the Network Statement when planning your transport.

Thank you for your understanding and cooperation!

Yours sincerely

Bernadett BALÁZS
Sales operation manager

András NYÍRI
Operations director
