Subject: Energy price forecast for January, February and March 2024

Dear Sir/Madam,

We would like to inform you that according to the information received from MÁV Zrt. the traction electricity unit price for the first quarter of 2024 will be more favourable than previously announced and is expected as follows:

January 2024: 63.7722 HUF/KWh
February 2024: 62.2862 HUF/KWh
March 2024: 61.7657 HUF/KWh

Similarly to the previous months, the final costs can only be determined subsequently, once your orders and our transport tasks will have been completed.

Once our Company has received the final electricity bill, its impact on the freight charges will be settled by mutual agreement in the tariffs/contract for 2024 as agreed so far with you and, if necessary, we will make you a new offer to settle the freight.

Should you have any further questions concerning the above-mentioned themes, please do not hesitate to contact your contact person or our Business Unit leaders.

Yours sincerely,

Sárdi Adrián
Sales support leader

Balázs Bernadett
Sales Operation director
